

How to Update your Kestrel 5000 Series Firmware using MAC/OSX

- ▣ Requirements
 - NK [Bluetooth Dongle](#)* (if LiNK compatible) (or)
 - NK [USB Data Transfer Cable](#) (and)
 - [Kestrel LiNK for MAC Program](#)
 - Kestrel 5000 Series unit
 - MAC computer**

Ballistic users SHOULD save their guns prior to performing this update as they may be erased.

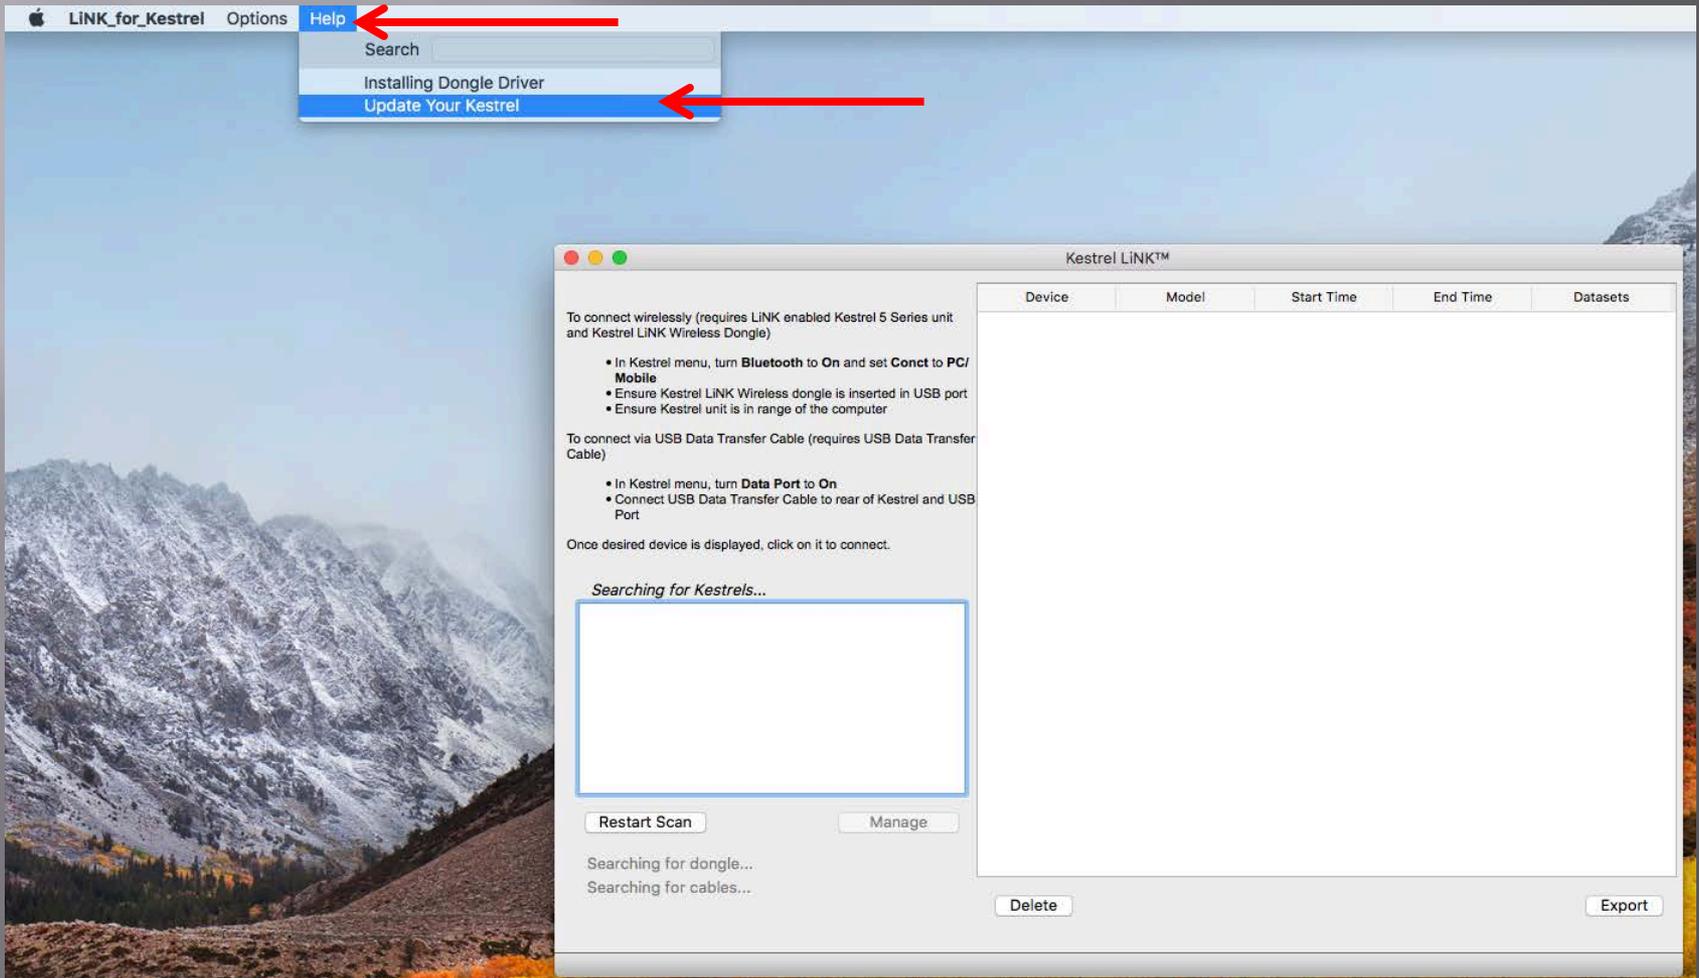

*You cannot use the same Bluetooth dongle that was used with 4000 series.

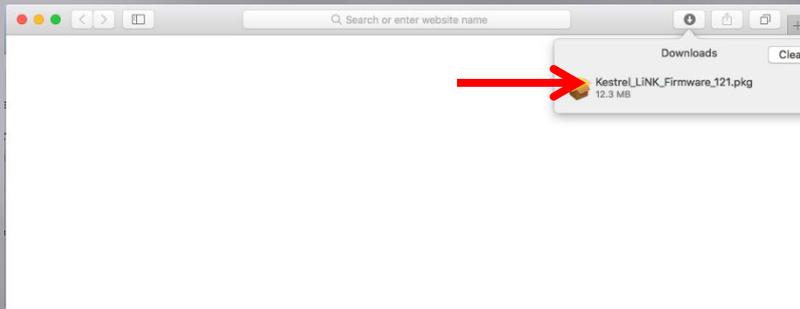

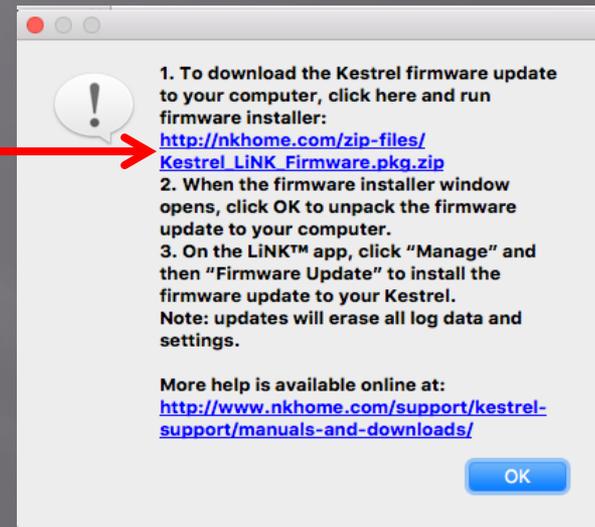

** This process is only for LiNK for MAC/OSX. For LiNK for Android or LiNK for iOS, the process is automated when you open the application.

1) After downloading and installing LiNK for MAC, open the application.

2) First you will need to download the latest firmware to your computer. To do this, click on the Help Tab and open up *Update Your Kestrel*. This will be found at the very top of the monitor screen.

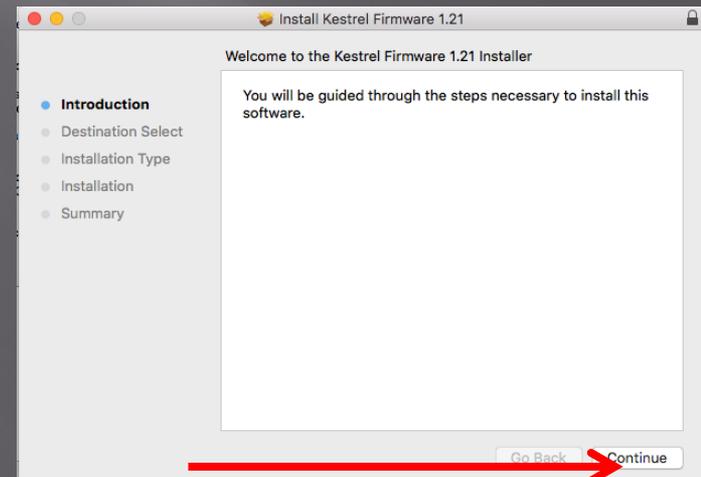

3) Click on the link in Step 1

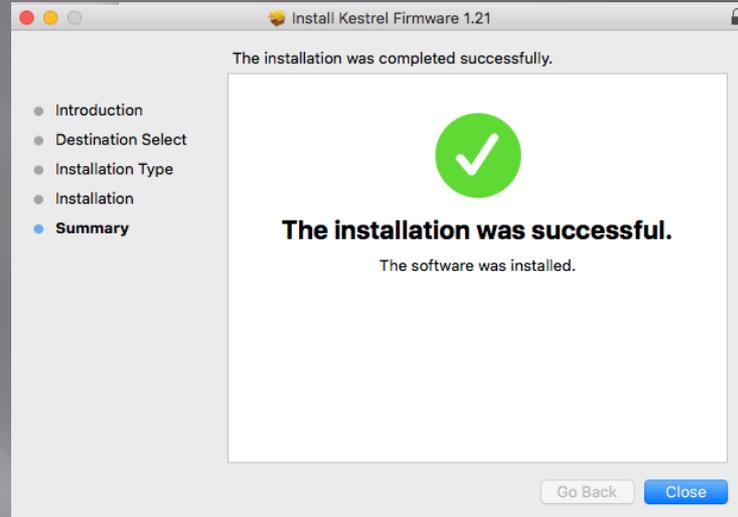

4) Once the file is downloaded, double click on it to open and run.

5) When the program begins the install process, click continue until the install is completed.

6) Follow the prompts to install the latest firmware onto your computer.

7) Next we will need to connect the Kestrel to the LiNK for MAC/OSX Application.

If you are using Bluetooth (i.e., LiNK Enabled):

On the Kestrel

- Turn Bluetooth to **ON**

- Press center button on Bluetooth and Set

Conct to **PC/MOBILE**. **Turn Privacy Pin off.**

On the computer

- Insert Bluetooth dongle.

On the application

- It should say "Connected to Dongle". If it still says "Searching for Dongle" please reinsert into a different USB port. If still having issues, disconnect all peripherals from computer, turn off computer for 5 minutes and then reboot and reconnect peripherals.

If you are using USB Transfer Cable:

On the Kestrel

- Turn Data Port to **ON**.

- Plug USB cable into back of Kestrel

On the computer

- Plug USB end of cable into computer.

On the application

- It should say "Connected to Cable" (as shown below)

The screenshot shows the Kestrel LiNK™ application window. The interface includes a menu bar with 'About' and 'Help'. Below the menu bar, there are instructions for connecting wirelessly and via USB Data Transfer Cable. A list of connected devices is displayed in a table format. The status bar at the bottom indicates 'Searching for dongle...' and 'Connected to cable', with a red arrow pointing to the latter. Buttons for 'Disconnect', 'Manage', 'Delete', and 'Export' are visible.

Please Note: The computer may take some time to install the driver the first time that the USB Data Cable or Bluetooth Dongle is inserted into the computer. Please allow some time for setup to occur. You may have to close and reopen the program after the driver is installed.

8) Select your Kestrel when it appears in the application.

9) Select the Manage Tab.

10) Select Firmware Update.

The screenshot displays the Kestrel LiNK software interface. On the left, there are instructions for connecting wirelessly and via USB. A table in the center lists connected devices. A 'Manage' dialog box is open on the right, showing device information and options for 'Download Log', 'Firmware Update', and 'Model Upgrade'. Red arrows indicate the steps: arrow 8 points to the selected device 'WEATHER - 2116310 (USB Cable)' in the list, and arrow 9 points to the 'Manage' button. A red arrow also points from the 'Firmware Update' button in the dialog box to the right.
